

Automatic Handling International, Inc. has over 45 years of experience supplying the Global Fortune 500 Consumer Products Manufacturing Industry. As a worldwide Original Equipment Manufacturer of custom and patented handling and packaging systems.

We provide technologies that increase production, protect valuable products, and eliminate touches through automation. The success of our customers is the foundation of our business.

Summary:

This role will be responsible for working with web-based applications and will be responsible for taking the company's web presence to the next level. As a member of a team, will contribute to the operational maintenance and continued development of a web-based ERP application system that provides analytic tools and interfaces to a database of technical information. Applies working knowledge of web applications, relational databases, and related programming languages, tools, technologies, and standards. Works on web-based applications and database back-end processes. Develops interfaces to include interactive webpages and web services. Possesses sufficient writing skills to prepare and generate technical reports and other documentation pertinent to the position.

Duties and Responsibilities:

- ▶ Application Development
 - ▶ Plan, design and maintain forms, features and stored procedures in an ERP application (Infor CloudSuite Industrial, formerly known as SyteLine) using VB.NET and T-SQL
 - ▶ Design and edit reports using Microsoft's SSRS and T-SQL
 - ▶ Develop auxiliary programs and services to connect applications and functions (internal and external)
 - ▶ Develop standalone programs or services to improve or automate existing digital processes
- ▶ User and Software Support
- ▶ Data Maintenance

Education and Experience:

- ▶ Bachelor or Associate's degree in Computer Science or related field with courses and training in application design, usability and development or equivalent experience
- ▶ 1+ years of application development and maintenance experience
- ▶ Familiarity with Microsoft SQL Server Management Studio, SSRS, and T-SQL
- ▶ Experience with Visual Basic
- ▶ Manufacturing industry experience is preferred

Skills:

- ▶ Able to prioritize multiple projects and tasks
- ▶ Excellent analytical, problem solving and data gathering skills
- ▶ Ability to work through entire software development life cycle, from analysis and design, coding and development, QA and debugging, and maintenance and troubleshooting

Work Environment:

- ▶ AHI offers an outstanding working culture, base salary, benefits, and long-term career growth opportunities
- ▶ Casual, but fast paced, where creativity is encouraged and the latest technology is always explored
